PROFILE

I am a driven person. My goal was to dive into software development and programming so that I could switch the career path of my life. I have wanted to better my family and my self while providing real time solutions for the worlds technological problems and become one of its greatest programmers.

PROJECTS

COURSE SCHEDULE APP | JAVASCRIPT | REACT | REDUX

React driven front end UI designed to mimic registering for courses based on having a 5 course schedule. <https://course-schedule-app.herokuapp.com/>

BIRTHDAY COUNTDOWN APP | JAVASCRIPT | REACT

React driven front end UI using the NPM countdown library to give the user a live countdown that displays the the days, hours, minutes, and seconds, until their next birthday. <https://birthday-countdown-app.herokuapp.com/>

DAILY SMARY UI APP | JAVASCRIPT | REACT | REDUX

React-Redux App with an API call to the Daily Smarty web application to pull post from the website to the UI application based on search input query. <https://daily-smarty-app.herokuapp.com/>

PROJECT MANAGEMENT APP | JAVASCRIPT | REACT | REDUX | MONGODB

Full stack React-Redux property management application designed as a template for property management businesses with sign-up, sing-in capabilities also utilizing Mongo DB to store user information. <https://property-manage-app.herokuapp.com/signup>

EXPERIENCE

One year as a student developing the applications above and some other minor applications to gain a basic understanding of how HTML, SASS, CSS, JAVASCRIPT, and PYTHON work to build and deploy web applications.

EDUCATION

BOTTEGA

Software Development | 2018
